BX SERIES - BILL-TO-BILL EXCHANGERS

with Genmega Single & Dual Note Bill Dispensers

RELIEVE YOUR ATTENDANTS OF CARRYING CASH AND BREAKING BILLS FOR YOUR CUSTOMERS

Standard Change-Makers announces the newest bill dispenser in its **BX Series Bill Exchanger** line-up. The Genmega one- and two-note bill dispensers are ATM dispensers that use enclosed cassettes that slide in and out of the main dispensing unit. Bills are loaded into the cassettes - which hold up to 1,000 new, ATM-quality bills each.

The Genmega dispensers have ultrasonic double-detection technology along the bill path to monitor each bill dispensed, and reduce bills stuck together from being dispensed. The cassettes allow you to load the bills easily, and minimize jamming during dispense. The single & dual note dispensers are mounted to a sliding base that pulls the dispenser out and turn to the side for reloading operations.

Standard Bill-to-Bill Exchanger machines are intended to relieve your attendants of carrying cash or breaking larger bills. This is added security for you and your employees, while still providing convenience for your customers. Bill-to-Bill Exchangers are ideal for card stores with cash revalue stations or customers that use large denomination bills in coin stores.
