

**Product Type** Small Chassis 120V Topload Washers Using Valves With Part Nos. 202395, 203741 or 205547

**Country of Origin** USA

**Purpose** Kit Available

**Interchangeable** Yes

**Subject** Topload Washer Valve Replacement Kit (Part No. 205765) Now Available

Alliance Laundry Systems has created a water valve service kit to provide servicers with a "universal" replacement water valve. Due to parts shortages, ALS has used different water valve vendors in order to meet production volume demands. Each of the three previous valves used different mounting, thus requiring different mounting brackets. This kit contains a dual filter water valve as well as a new mounting bracket that can be used to replace all three previous water valves. See *Table 1* for part numbers and descriptions of previous valves.

Kit No. 205765 can be used to replace the following:

Water Valve Part No.	Color
202395	Blue
203741	Yellow
205547	Blue
